

MARCO TORRICE

Written by B. Anett, Polgár Judit and Jasna Cupic:

His way of thinking about moving the body through space, by separating the limbs in mostly 3 parts, using the weight of the head, of the body, swinging is just great to me. He gave/gives us fantastic experience by using our body in a way that is different from elongated, fluid movements. On one hand, I find it hard, but on the other hand, its valuable because we are used to move so separately. Sometimes I feel the talking about experience is too much or with a pressure, especially when there was not enough time to go into the tasks. The idea of changing to basic task each day helps a lot. Like this, my body and brain has an opportunity to sleep over it and find some answers to questions that came up during the class. The music is great. I almost never feel pressure about being to the music, except if the task says so, and I appreciate that Marco doesn't expect anything to look somehow. But he always supports us to be ourselves, and not to copy anyone.

Written by Novák Evelin, Ana Tot, Német Ildikó, Bokor Felícia:

We love you! Really patient teacher,

Knows and follow the improvement of each of us from the beginning (when he meets you) through every class till the end. Personal corrections, plenty of explanations.

Corrections are always clear and get the point. He makes the class fun, strong, he make everybody wants to work.

Never got bored, atmosphere always get on a high level till the end of class even if it varies in the beginning.

Written by Szívós Kata, Zhang Mary:

It's very good, that you can pass on the essence of your work, you give us instructions all the time. Even though we couldn't speak a lot, it very helpful and useful the end of the class, when we are talking about our experiences and opinion, which makes our body and mind more self-conscious. The techniques you teach us are really very useful, a next year i would like you to teach us some combination.

Written by Czédulás Hanga, Szokol Ketlin, Vágner Orsi, Varga Dóri

Really enjoyed it, the class, the personality of you. The whole thing. Your teaching is really experience based. Would be nice to spend more time with you.

The only thing, sometimes it's hard to understand what you say, the details, for example: whether something you explained IS right or it IS NOT right. Maybe it's too quiet.
